#### What is?

- A system of rules and regulations designed to protect people, animals, climate, etc. from some bad eventuality
- Solutions for problems that should be based on rational and grounded in some logical thinking or by data.
- The definition of a policy is a written contract or agreement. An example of a policy is the written contract received from an insurance company that guarantees to insure someone against a certain type of damage.
  - A written contract in which one party guarantees to insure another against a specified loss, damage, injury, etc. in return for payments, usually periodic, called premiums.
- The Internet is full of definitions: https://www.yourdictionary.com/policy
